Born in Hamilton, Ont., December
27th, 1851, Mr. Midwinter decided
to blaze the trail of the west while
he was yet in his twenty-fifth year.
Thus on May 6th, 1877, he started
out, and arrived in Winnipeg, which
was then Fort Garry, May 21st, and
has resided here ever since. The
trip, made before the advent of the
railway, was for the greater part by Ki. go ne noı ing Mr avı pia railway, was for the greater part by water. Reaching Windsor, his next stop was Red Lake, thence to where Grand Forks now stands, and the enl  $El\epsilon$ Ru Grand Forks now stands, and the distance between Grand Forks and Winnipeg was made over the waters Oli Gla Winnipeg was made over the of the Red river.

During the earlier years of his residence here Mr. Midwinter travelled considerably, and covered the distance between Winnipeg and Portage la Prairie seven times on foot. He was employed with the firm of Messrs. Brown & Rutherford upwards of twenty years. At the close of his association with this firm he was, for a number of years, occupied in the pursuit of market gardening. In his present home he has resided over the long period of thirty-six years. ins No. ber ma oth ber Sm Eti son citu frie -1 suc clo: ren In the winter months he found a diversion in curling, although in these early days the devotees of the game did not pursue their rocks with the same measure of comfort as that enjoyed by the curler of today. However, the game continued to be one of his most popular pastimes, and he was one of those who interested—themselves in the formation of the Elmwood Curling club.

For some twenty-one years Mr. Midwinter served in public office, (B. of t Mo SCO: Dol tag wit Ora reg mei lak are

In the opinion of Mr. Midwinter, in t the mild weather Winnipeg is enjoying at the present time is not at all unusual. He remembers coming by duc stage from Portage la Prairie to 11 Winnipeg on Dec. 23, 1877, wearing no overcoat. "That was an odd Christmas," he said. "It was dry weather, with not a bit of snow or frost in the ground." The following and year was even more unusual. Open chu water remained practically ice-free λ and at the end of March, 1878, a F boat made its way up the Red river from Fargo. But like most pioneers, Mr. Midwinter believes winters as a rule are will not so cold as they used to be. For six weeks in 1879, the coldest winthis his ter he remembers, the mercury hov-Wis ered around the 50-below mark. Mr. Midwinter invariably interested er himself in politics, and it is one of Сте his most cherished recollections that he did not neglect on a single occasion to exercise his franchise. assertion he invariably punctuated and with the added witticism that he "almin ways voted right." Ser On Sunday Mr. Midwinter received the congratulations of a wide circle Γ of friends and acquaintances, many of whose messages were transmitted seer by telephone.
